The Hybrid Option

These three directions don't have to be mutually exclusive. The strongest approach may be a **tiered brand architecture**:

TIER	BRAND	AUDIENCE	USAGE
Consumer Product	void.	Retail depositors	Landing page, app, social media
Institutional Product	Void Capital	Funds, treasuries	Institutional landing page, whitepapers

Corporate / Dev	Void Labs	Developers, partners	GitHub, docs, technical blog, corporate
-----------------	------------------	----------------------	---

This mirrors what Aave (App / Pro / Institutional) and Coinbase (Coinbase / Advanced / Prime) do. One brand family, three faces.
